TCI® 6x Six-Speed Automatic Transmission Kits For Pontiac Engines

Transmission technology leader develops the world's first six-speed automatic transmission for Pontiac applications capable of handling up to 850 horsepower

Pontiac owners can now take full advantage of the innovative TCI® 6x Six-Speed Transmission. TCI® has created a new package that includes the original TCI 6x Six-Speed Automatic Transmission and a Pontiac bellhousing. The 4L80E-based TCI® 6x Six-Speed Automatic Transmission is a fully programmable transmission that gives drivers six forward gears (2.97, 2.23, 1.57, 1.18, 1.00, 0.75) for quicker acceleration and increased fuel economy at cruising speeds. Capable of handling up to 850 horsepower, and with a full manual option when utilizing a paddle shifter or bump shifter, these kits are perfect for Pro Touring, street and race vehicles.

This kit allows you to bolt the 6x six-speed to a Pontiac motor without using an adapter plate. All kits include a 6x transmission with a Pontiac bellhousing, flexplate, transmission control unit with harness, dipstick, fluid and cooler – there is no need to purchase a special flexplate or adapter. Additionally, the flexplates and bell housings are SFI-approved. TCI® also offers 6x Six-Speed Transmission Packages which include the TCI® Paddle Shifter or Outlaw™ Shifter – for a complete turn-key drivetrain solution.

A fully programmable transmission control unit allows users to program specific shift points and line pressures, as well as converter lockup, giving Pontiac-powered vehicles the most functional and modern drivetrain combination on the market. In addition, each TCI® transmission utilizes the patented HDT (Heat Dissipating Technology™) Coating™ for cooler operating temperatures and improved drivetrain efficiency. TCI® engineers run each transmission across a computer-controlled transmission dyno to ensure proper line pressures and top notch performance. Individual serialized spec sheets containing test scores are included with each transmission.

For more information about the new TCI® 6x Six-Speed Automatic Transmission Kits for Pontiacs or any other TCI® product, call us at 1-888-776-9824, or visit us online at www.tciauto.com.

Features & Benefits:

- Packages original 6x Six-Speed Automatic Transmission w/ Pontiac application bellhousing and are capable of 850 hp
- Six forward gears & fully programmable shift points improve both acceleration & fuel economy
- Kit allows user to bolt a six-speed transmission to Pontiac motor without use of an adapter plate
- Unique HDT (Heat Dissipating Technology™) Coating™ for cooler & more efficient operations
- Includes transmission with bellhousing, transmission control unit, wiring harness, flexplate, transmission cooler, dipstick and fluid
- Packages that include the TCI Paddle Shifter or the Outlaw™ Shifter also available
